EDUCATION

University Of Auckland

Auckland, NZ

Bachelor of Science, Majoring in Computer Science

Feb. 2024 – Nov 2027

- **Relevant Coursework:** Data Structures & Algorithms, Computer Architecture, Object Oriented Programming, Machine Learning, Databases
- **Extracurriculars:** WDCC Technical lead, UOACS Tech/Education Executive

EXPERIENCE

Web Development And Consulting Club

Feb. 2026 – Present

Technical Lead

Auckland, NZ

- Lead a cross-functional team of **10 members** in an agile environment, running sprint meetings, managing timelines, and delivering a year-long client project for the UoA Volleyball Club.
- Architected and set up the project's technical infrastructure, defining the tech stack and establishing development workflows to ensure a scalable and maintainable codebase across the team.
- Mentoring **7 developers** through regular code reviews and hands-on guidance, enforcing best practices in code quality, version control, and software design.

University Of Auckland Computer Science Society

Aug. 2025 – Present

Tech/Education Executive

Auckland, NZ

- Engineered and maintain the club's official website uoacs.co.nz, featuring a fully integrated sign-up platform that has onboarded **250+ member applications**
- Served as MC and technical judge at the UOACS X WINCS hackathon with **50+ participants**, evaluating projects on code quality, innovation, and feasibility, and engineered a reusable starter website template.
- Designed and facilitated technical workshops on software engineering concepts; most notably led a DevOps workshop with an interactive task ([repository](#)) gaining **45+ forks**, paired with live a live coding demo.

PB Technologies

Nov. 2022 – Feb. 2023

Operations Assistant

Auckland, NZ

- Processed and monitored customer returns, warranty claims, and product authorizations in strict accordance with company policies and service-level agreements, ensuring compliance and timely resolution of customer requests.
- Maintained accurate documentation and performed detailed data entry within internal inventory systems to ensure proper tracking of returned goods and stock adjustments.
- Collaborated closely with warehouse and logistics team to coordinate inspection, processing, redistribution, and administrative tracking of returned products.

PROJECTS

Personal Website | *NextJS, React, Javascript, TailwindCSS*

Aug. 2025 – Aug. 2025

- Designed and developed a personal website aleckshen.com using Next.js and React, focusing on component reusability, maintainability, and a smooth user experience.
- Integrated interactive features using React hooks to enhance navigation flow and user engagement while keeping the application lightweight.

Pylib | *Python, CLI Tool Development*

Sep. 2025 – Sep. 2025

- Built a Python CLI tool that selects a random Auckland library and displays it in the terminal, supporting parameters for filtering locations and customizing selection behavior.
- Packaged the tool for global execution, enabling users to run the `pylib` command from any directory.
- Designed clear command outputs, helpful error messages, and flexible argument handling to ensure reliability across environments.
